Index to Volume XXVII, September 1997 to May 1998

Author Index

Allen, Bruce C., and Clyde Freeman Herreid. Is there life on Mars? The Case Study. M/A 307

Allen, Robert D. Distance learning—Meeting our educational responsibilities with technology. SCST M 393

Arce, Josefina, and Rosa Betancourt. Student-designed experiments in scientific lab instruction. N 114

Banks, Dale A. Profiles. M 371

Barot, Bal. Computer literacy and the community college. Letters. D/J 158

Barry, Dana M. Colleges adopt schools to enhance science education. Letters. N 87

Beiswenger, Ronald E., Joseph I. Stepans, and Patricia A. McClurg. Developing science courses for prospective elementary teachers. F 253

Buchwald, Caryl E. Profiles. N 83

Bybee, Rodger. Improving precollege science education—The involvement of scientists and engineers. M/A 324

Cannon, John R. The *Constructivist Learning Environment Survey* may help halt student exodus from college science courses. Research & Teaching. S/O 67

Caprio, M.W., and Lynda B. Micikas. Getting there from here. The Two-Year College. D/J 217

Caprio, M.W., Parris Powers, Jeffery D. Kent, Susan Harriman, Charles Snelling, Paula Harris, and Melissa Guy. A path toward integrated science—The first steps. The Two-Year College. M 430

Carle, Daria O., and Margie Krest. Facilitating research between the library and the science writing classroom. M/A 339

Chaplin, Susan B., Jill M. Manske, and Jennifer L. Cruise. Introducing freshmen to investigative research—A course for biology majors at Minnesota's University of St. Thomas. M/A 347

Clark, Deborah Campero. Social issues and genetic testing: A case study using advocacy groups. S/O 17

Cohen, Paul and Brenda. Historic Bartram's garden and house in Philadelphia. Finding Science Past and Present. N 147

Cohen, Paul and Brenda. The archeological museum of Seville, Spain. Finding Science Past and Present. F 287

Cohen, Paul and Brenda. The Manuel da Maia Water Museum in Libson, Portugal. Finding Science Past and Present. M/A 360

Cohen, Paul and Brenda. L'Aquàrium de Barcelona in Spain. Finding Science Past and Present. M 394

Cooper, James, and Pamela Robinson. Small-group instruction in science, mathematics, engineering, and technology (SMET). Research & Teaching. M 383

Coppola, Brian P. Profiles. D/J 155

Coppola, Brian P., and William H. Pearson. Heretical thoughts II: On lessons we learned from our graduate advisor that have impacted our undergraduate teaching. M 416

Cowan, M.M., and K.W. Piepgrass. The first day of class on a two-year campus. The Two-Year College. N 104

Davis, Larry E. Reform and improvement of university-level science teaching. SCST. D/J 171

DeBruin, Jerome E. Reviewing *The Hidden Curriculum: Faculty-Made Tests for Science* by Sheila Tobias and Jacqueline Raphael. Book Reviews. M/A 363

Didion, Catherine J. A report card on gender equity on the twenty-fifth anniversary of Title IX. Women in Science. N 97

Didion, Catherine J. Mentoring—An essential teaching tool. Women in Science. D/J 173

Didion, Catherine J. Framing a national agenda on women's issues. Women in Science. M/A 354

Dodds, Walter, and David Pimentel. Letter to world leaders from scientists concerning human resource use and population growth. Letters. F 245

Donovan, Michael P. Profiles. S/O 3

Donovan, Michael P. Creating a learning-friendly curriculum. SCST. S/O 72

Donovan, Michael P. NSTA's Boston convention in March '99—It's time to start thinking about proposals. SCST. N 95

Donovan, Michael P. Stepping back from the picture to see more than the dots. SCST. F 245

Donovan, Connie. Resource management, coexistence, and balance—The fundamentals of teaching waste management. SCST. M/A 352

Dubeck, Leroy W., and Rose Tatlow. Using *Star Trek: The Next Generation* television episodes to teach science. M/A 319

Duchovic, Ronald J., David P. Maloney, Aniket Majumdar, and Richard S. Manalis. Teaching science to the nonscience major—An interdisciplinary approach. F 258

Dujari, Anuradha. Reviewing *Constructing Science in Middle and Secondary School Classrooms* by Dale R. Baker and Michael D. Piburn. Book Reviews. N 151

Dujari, Anuradha. Reviewing *Why Use Statistics?* Instructional Media. F 294

Ehlers, Vernon J. Science literacy and the U.S. Congress. Guest Editorial. N 85

Ehrlich, Robert, and Maria Dworzecka. On the road to Damascus—Technology, fear, and the fear of technology. D/J 153

Eichinger, David C., and Gerald H. Krockover. Developing a faculty portfolio—Tips and suggestions for science faculty. M 411

Epstein, Jerome. Cognitive development in an integrated mathematics and science program. D/J 194

Fisher, David. Reviewing *Ocean Drilling Program: From Mountains to Monsoons.* Instructional Media. N 150

Fisher, Thomas M. The essence of a theory. Letters. N 87

Fort, Deborah C. Feminism's lessons for women in science. Women in Science. S/O 53

Fox, Marty. Microbe wars: A demonstration of microbial antagonism. Favorite Demonstration. S/O 74

Fox, Marye Anne. Improving undergraduate science education—National initiatives, local implications. Guest Editorial. M 373

Francisco, Joseph S., Marcella Trautmann, and Gayle Nicoll. Integrating a study skills workshop and pre-examination to improve students' chemistry performance. F 273

Gittleson, Stephen M. Reviewing *Academic Environment—A Handbook for Evaluating Employment Opportunities in Science* by Karl W. Lanks. Book Reviews. M 435

Glasson, George E., and Woodrow L. McKenzie. Investigative learning inundergraduate freshman biology laboratories. D/J 189

Golestaneh, Kamran. Teaching chemistry through demonstration—The exploding can demonstration. Favorite Demonstration. M/A 356

Harris, David. Use of customized digital images for teaching human anatomy. N 127

Harris, Ellen. Integrating experiential learning into the study of nutrition. M 401

Hedeen, Stanley E. Evolutionary steps. N 119

Herreid, Clyde Freeman. What is a case? The Case Study. N 92

Herreid, Clyde Freeman. What makes a good case? The Case Study. D/J 163

Herreid, Clyde Freeman. Sorting potatoes for Miss Bonner. The Case Study. F 236

Herreid, Clyde Freeman. Return to Mars. The Case Study. M 379

Janick-Buckner, Diane. Getting undergraduates to critically read and discuss primary literature. S/O 29

Jensen, Murray S. Finding a place for the computer in the introductory biology laboratory. Point of View. F 247

Johnston, Karen. Misguided use of an educational tool. Letters. N 87

Juillerat, Florence, Nathan Dubowsky, Nancy V. Ridenour, William J. McIntosh, and Mario W. Caprio. Advanced placement science courses: High school-college articulation issues. The Two-Year College. S/O 48

Kandel, Marjorie. Miles Pickering—A bibliography. Point of View. D/J 174

Kauffman, George B. Profiles. S/O 3

Kauffman, George B. Reviewing *Science: Good, Bad and Bogus, The Art of Deception, Flim Flam!: Psychics, ESP, Unicorns, and Other Delusions,* and *Gullible's Travels.* Instructional Media. S/O 78

Kauffman, George B. Reviewing *Element One: Hydrogen: Key to the Sustainable Energy Revolution.* Instructional Media. N 149

Kauffman, George B. Gender vs. sex. Letters. D/J 158

Kauffman, George B. Reviewing *The Origin of Species—Creationism and Evolution.* Instructional Media. D/J 166

Kauffman, George B., and Judith M. Reposo. Reviewing *Human Muscular Male and Female Torso.* Instructional Media. F 293

Kauffman, George B. Reviewing *The Hubble Library of Electronic PictureBooks.* Instructional Media. F 294

Kauffman, George B. Reviewing *Secrets of Science.* Instructional Media. M/A 365

Kauffman, George B., and Mario L. Reposo. Reviewing *The Greening of Cuba.* Instructional Media. M/A 367

Kauffman, George B. Reviewing *The Chemistry Place*™. Instructional Media. M 436

Kauffman, George B. Reviewing *Science and the Environment.* Instructional Media. M 436

Keating, Joseph, and Jeffrey Ihara. An integrated content/process approach to teaching science to elementary teachers. D/J 183

Kennepohl, Dietmar, and Arthur M. Last. Science at a distance. S/O 35

King, Hobart. Profiles. F 227

Klionsky, Daniel. A cooperative learning approach to teaching introductory biology. M/A 334

Knabb, Maureen T. Creating a research environment in an introductory cell physiology course. D/J 205

Koprowski, John L. Sharpening the craft of scientific writing. N 133

Labianca, Dominick A. Making nonscience majors more receptive to organic chemistry. M 397

Last, Arthur M., and Peter W. Slade. A colorful demonstration of Le Châtelier's principle. Favorite Demonstration. N 143

Lehming, Rolf F. Do academic research costs drive up undergraduate tuition? Point of View. N 107

Levin, Douglas R., and Jerome A. Montvilo. Applied coastal oceanography—A course that integrates science and business. M/A 329

MacKinnon, Gregory. Constructing meaning in the chemistry laboratory. Letters. S/O 6

MacKinnon, Gregory. Computers in science teacher education. Letters. M/A 305

Mann, Jennifer, Karen Williams, and Carl Rutledge. Learning approaches, course experience, and astronomy understanding in the Oklahoma project. Research & Teaching. F 240

McComas, William F. Profiles. D/J 155

Metzenberg, Stan. Profiles. N 83

Millen, Jim. Profiles. M/A 299

Miller, Judith. Profiles. M/A 229

Index to Volume XXVII, September 1997 to May 1998

Educational Philosophy
Cooper, James, and Pamela Robinson. Small-group instruction in science, mathematics, engineering, and techology (SMET). Research & Teaching. M 383
Coppola, Brian P., and William H. Pearson. Heretical thoughts II: On lessons we learned from our graduate advisor that have impacted our undergraduate teaching. M 416
Donovan, Michael P. Creating a learning-friendly curriculum. SCST. S/O 72
Dujari, Anuradha. Reviewing *Constructing Science in Middle and Secondary School Classrooms* by Dale R. Baker and Michael D. Piburn. Book Reviews. N 151
Fisher, Thomas M. The essence of a theory. Letters. N 87
Nissani, Moti. Can the persistence of misconceptions be explained? Letters. S/O 6
Paldy, Lester G. Undergraduate education in science: The message. Editorial. M/A 300

Environment
Dodds, Walter, and David Pimentel. Letter to world leaders from scientists concerning human resource use and population growth. Letters. F 245
Donovan, Connie. Resource management, coexistence, and balance—The fundamentals of teaching waste management. SCST. M/A 352
Fisher, David. Reviewing *Ocean Drilling Program: From Mountains to Monsoons.* Instructional Media. N 150
Kauffman, George B. Reviewing *Element One: Hydrogen: Key to the Sustainable Energy Revolution.* Instructional Media. N 149
Kauffman, George B., and Mario L. Reposo. Reviewing *The Greening of Cuba.* Instructional Media. M/A 367
Kauffman, George B. Reviewing *Science and the Environment.* Instructional Media. M 436
Price, John M. Reviewing *Environmental and Workplace Safety—A Guide for University, Hospital and School Managers* by James T. O'Reilly, Philip Hagan, and Peter de la Cruz. Book Reviews. F 292
Weller, Herman G. A running inquiry: Nature asked the questions during this jog. Point of View. M 389

Evolution
Kauffman, George B. Reviewing *The Origin of Species—Creationism and Evolution.* Instructional Media. D/J 166
Sinclair, Anne, and Murray Patton Pendarvis. Evolution vs. conservative religious beliefs. Research & Teaching. D/J 167

Interdisciplinary Studies
Duchovic, Ronald J., David P. Maloney, Aniket Majumdar, and Richard S. Manalis. Teaching science to the nonscience major—An interdisciplinary approach. F 258
Levin, Douglas R., and Jerome A. Montvilo. Applied coastal oceanography—A course that integrates science and business. M/A 329
Papacosta, Pangratios, and Ann Hanson. Artistic expressions in science and mathematics. F 250

Mathematics
Shmaefsky, Brian R. Reviewing *The FFT Workshop.* Instructional Media. D/J 165

Multimedia
Dubeck, Leroy W., and Rose Tatlow. Using *Star Trek: The Next Generation* television episodes to teach science. M/A 319
Harris, David. Use of customized digital images for teaching human anatomy. N 127
Johnston, Karen. Misguided use of an educational tool. Letters. N 87
Kauffman, George B. Reviewing *Secrets of Science.* Instructional Media. M/A 365
Paldy, Lester G. Graphics in the lecture hall. Editorial. S/O 4
Powers, Parris. One path to using multimedia in chemistry courses. The Two-Year College. M/A 317
Shmaefsky, Brian R. Reviewing *Multimedia Biology Courseware.* Instructional Media. F 295
Tamarin, Robert H. Reviewing *Web Teaching: A Guide to Designing Interactive Teaching for the World Wide Web* by David W. Brooks. Book Reviews. M/A 364

Nutrition
Harris, Ellen. Integrating experiential learning into the study of nutrition. M 401

Oceanography
Whitford, Dennis J., and Greg A. Eisman. Making science come alive. N 109

Physics
Uritam, Rein A. Reviewing *What is Quantum Mechanics? A Physics Adventure* by the Transnational College of LEX. Book Reviews. N 150

Problem Solving
Woods, Donald R. Getting support for your new approaches. PS Corner. F 285

Reform in Science Education
Caprio, M.W., and Lynda B. Micikas. Getting there from here. The Two-Year College. D/J 217
Davis, Larry E. Reform and improvement of university-level science teaching. SCST. D/J 171
Fox, Marye Anne. Improving undergraduate science education—National initiatives, local implications. Guest Editorial. M 373

Science & Society
Lehming, Rolf F. Do academic research costs drive up undergraduate tuition? Point of View. N 107
Paldy, Lester G. Bright light in Encinitas. Editorial. D/J 157
Paldy, Lester G. Cures, risks, and human rights in America. Editorial. F 229
Spurlin, Quincy. Phytochemistry and culture. S/O 23

Scientific Writing
Carle, Daria O., and Margie Krest. Facilitating research between the library and the science writing classroom. M/A 339
Donovan, Michael P. NSTA's Boston convention in March '99—It's time to start thinking about proposals. SCST. N 95
Koprowski, John L. Sharpening the craft of scientific writing. N 133
Rice, Richard E. "Scientific writing"—A course to improve the writing of science students. F 267

Statistics
Dujari, Anuradha. Reviewing *Why Use Statistics?* Instructional Media. F 294
Ruber, Ernest. Reviewing *An Introduction to Experimental Design and Statistics for Biology* by David Heath. Book Reviews. F 291

Teacher Education
Beiswenger, Ronald E., Joseph I Stepans, and Patricia A. McClurg. Developing science courses for prospective elementary teachers. F 253
Bybee, Rodger. Improving precollege science education—The involvement of scientists and engineers. M/A 324
Keating, Joseph, and Jeffrey Ihara. An integrated content/process approach to teaching science to elementary teachers. D/J 183
White, Brian T. A curriculum for recitation sections in introductory biology. M 407

Travel
Cohen, Paul and Brenda. Historic Bartram's garden and house in Philadelphia. Finding Science Past and Present. N 147
Cohen, Paul and Brenda. The archeological museum of Seville, Spain. Finding Science Past and Present. F 287
Cohen, Paul and Brenda. The Manuel da Maia Water Museum in Libson, Portugal. Finding Science Past and Present. M/A 360
Cohen, Paul and Brenda. L'Aquàrium de Barcelona in Spain. Finding Science Past and Present. M 394
Raap, Rintje. The Teyler Museum in the Netherlands. Finding Science Past and Present. S/O 63
Stewart, Martin. Restoring the great telescope at Birr Castle, Ireland. Finding Science Past and Present. D/J 222

Women and Minorities in Science
Didion, Catherine J. A report card on gender equity on the twenty-fifth anniversary of Title IX. Women in Science. N 97
Didion, Catherine J. Mentoring—An essential teaching tool. Women in Science. D/J 173
Didion, Catherine J. Framing a national agenda on women's issues. Women in Science. M/A 354
Fort, Deborah C. Feminism's lessons for women in science. Women in Science. S/O 53
